

## **Senior Product Designer / Engineer – Maddison Product Design – West Sussex Remuneration dependent on capability & experience**

### **About Maddison:**

Maddison is a leading, creative product design consultancy with a thirty-year track record of developing innovative products. We work with companies ranging from University spin-outs to global corporations, specialising in healthcare and scientific products but also working in industrial and consumer markets. Maddison has a friendly atmosphere with a mix of industrial designers and engineers, working in a collaborative and exciting environment. You can expect a diverse range of projects which demands flexibility and adaptability. We are currently going through a period of growth and are looking for enthusiastic and capable individuals to join the team.

### **The Role:**

We are looking for a Senior Product Designer / Engineer who has ambitions to progress to a management position within a growing company. You will have an in-depth understanding of design and project management. Excellent client-facing and team leadership skills are required. You will have experience of diverse and complex design projects and a good understanding of the design consultancy business.

### **Essential Skills & Experience:**

- 10+ years' experience within a design environment
- Strong understanding of engineering design, materials and manufacturing processes
- Project management experience – managing technical risk and diverse teams
- Hands-on SolidWorks skills
- Strong client facing skills

### **Nice to Have:**

- Experience working with medical devices
- Knowledge of medical device regulations
- Understanding of human factors and usability engineering

CV, including portfolios, should be emailed to Jo Trew at [jo.trew@maddison.co.uk](mailto:jo.trew@maddison.co.uk). All information will be treated confidentially. [www.maddison.co.uk](http://www.maddison.co.uk)
